This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.

+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.

+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.

+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. PREFACE.

The publication of a handbook of learned societies was one of the projects recommended to the Carnegie Institution by its Advisory Committee on Bibliography (*see* Yearbook, no. 1, 1902, p. 182-184). This was approved by the Trustees, and grants were made for the purpose, the expenditure and supervision being entrusted to the Librarian of Congress. After consultation with the authorities of the Carnegie Institution the organization of the work was placed in charge of Mr. J. David Thompson of the Library Staff, who has personally edited this volume and seen it through the press, the material having been compiled under his direction by Mrs. Lucy C. Daniels Thompson, assisted by Miss Mary F. Griffin.

The present volume, devoted to America, was completed for publication first, because printed information for this region is less available. Pending decision as to further publication, the remaining material relating to societies and institutions in the Old World will, for the present, be kept on file available for consultation at the Library of Congress.

HERBERT PUTNAM,
Librarian of Congress.

Washington, D. C., May 25, 1908.

INTRODUCTORY.

The scope of this manual may be defined by indicating the geographical region covered, the classes of societies and institutions included or excluded, and the information presented regarding each organization described.

The present volume relates to North and South America and the adjacent islands, including, however, also the American schools at Athens and Rome, and in Palestine, which are associated with the Archaeological Institute of America. Similar material for the rest of the world has been collected but is not yet edited for publication.

With the exceptions noted below, it has been our aim to include all active publishing societies, together with universities, colleges, museums and laboratories issuing contributions to knowledge, and institutions devoted to research. In the case of national scientific societies, however, the test of publication has not been applied, and many local historical societies in North America which do not publish have been briefly noted under the various states and provinces. The plan of the investigation, as approved by the Trustees of the Carnegie Institution, provided for the omission of societies and institutions devoted to medicine[a] and agriculture[b]; and as the work progressed it was found necessary to exclude also patriotic societies, local bar associations[c] and teachers' organizations[d], and leagues for civic improvement or charitable purposes. Astronomical and meteorological observatories[e] have been included only when forming departments of universities, colleges, etc.

The following outline, accompanied by a circular letter requesting the necessary data, was sent to all organizations known to us within the scope of the Handbook and will serve as a description of the information here published:

1. NAME.—Full official name of the society or institution at the present time.
2. ADDRESS.—Permanent postal address, with name of permanent official (if any) to whom communications should be sent.
3. HISTORY.—Brief notes, including dates of foundation and incorporation, changes of name or organization (*e. g.*, fusion with other societies), and any other important events, together with bibliographical references to any published sources of fuller information.

4. OBJECT.—Statement given in the constitution or act of incorporation.
5. MEETINGS.—Time and place.
6. MEMBERSHIP.—Number of members, classed as active, honorary, corresponding, &c., with entrance fee and annual dues paid by each.
7. SERIAL PUBLICATIONS.—Exact title of each serial publication issued by the society or institution since its foundation, and a statement for each series of such publications giving change of title (if any), number of volumes (or brochures), period covered, place and dates of publication, and size.

   Where the present society has been formed by fusion of earlier societies, a similar statement regarding the serial publications of each of these is desired.

   If a publication is now, or has been, issued jointly with other societies, this fact should be noted.

   The content of each serial publication should also be noted, if not clearly defined by its title or by the statement of the object of the society.
8. SPECIAL PUBLICATIONS.—If a published list exists, kindly refer to it or send a copy if one can be spared.
9. DISTRIBUTION OF PUBLICATIONS.—(a) Conditions of exchange (b) price-list and place of sale.
10. RESEARCH FUNDS AND PRIZES.—Under each fund, a statement as to the special field covered, the amount and conditions of grants in aid of research or conditions of competition in the case of prizes.

In brief, the Handbook may be said to supply, in regard to societies and institutions, information similar to that contained in bio-bibliographic reference works for individual authors. In contrast with "Minerva," which is primarily a *yearbook* of learned *institutions* (though including also the principal learned societies), and which by reason of its annual issue is able to furnish up-to-date information as to the variable personnel, annual budget, etc., chief importance has been attached in this work, which is principally a *handbook* of learned *societies* (including also certain classes of learned institutions), to the information of permanent value, *viz.:* history, publications, and special funds from which grants are made in aid of research or prizes offered for results attained.

The material furnished in response to the above circular and supplementary inquiries has been verified from printed sources wherever possible and the serial and special publications of societies and institutions included have been examined as far as they were available in the Library of Congress

in Montreal and Quebec; to Mr. Luis M. Perez, of Havana, who revised the Cuban material; to the American diplomatic representatives in Central and South America, who, through the courtesy of the Department of State, communicated with the learned societies and institutions in the countries to which they were accredited and forwarded the information supplied; to Dr. H. von Ihering, Director of the Museu Paulista, São Paulo, Brazil, who supplied the data relating to that state.

In the use of a reference work of this character, it is important to notice at the outset the arrangement of the material it contains. A glance at the table of contents will suffice to show that the primary division is by countries in the order there indicated. Under each country, the national societies or those without fixed headquarters or meeting place (and, in the case of the Latin American republics, also the societies and institutions of the capital city) are placed first, alphabetically by official name; and the local societies and institutions follow, entered by city or state according to the plan described in a note at the head of page 97. If the information required is not found immediately, reference should be made to the index where the names of societies and institutions, serial publications, research funds, prizes and medals, expeditions, cities, counties and states are arranged in a single alphabet, together with subject headings under which are collected the references to all organizations or serial publications treating of a particular region of knowledge or special subject.

As the final proof of the early pages of this volume was read over a year ago, the "additions and corrections" (p. 548-562) form an integral and essential part of the book and should be consulted in connection with the body of the text, with which they are indexed.

UNITED STATES.

NATIONAL SOCIETIES.

Actuarial Society of America.

Address.—32 Nassau Street, New York City. Secretary: Arthur Hunter.

History.—Founded Apr., 1889.

Ref.: Papers and transactions, v. 6, no. 21 (decennial number), p. 117-135.

Object.—Promotion of actuarial science.

Meetings.—Annual meeting on 1st Thursday after the 14th day of May, in New York City. A second meeting customarily held each year in the autumn, at such date and place as may be decided upon by the council.

Membership.—120 fellows (annual dues, $10 in America, $5 in other countries); 29 associates (annual dues, $5). Membership at first confined to the official and assistant actuaries of life insurance companies, together with a few persons not connected with companies, but eminent in the actuarial profession. In 1898 a class of associates was formed, composed of persons engaged in actuarial pursuits and looking forward to future membership in the society. Admission to this class by examination.

American Alpine Club.

Address.—Philadelphia, Pa. Secretary: Henry G. Bryant, 2013 Walnut Street.

History.—First meeting held in Washington, D. C., Jan. 2, 1903.

Ref.: American Alpine Club. By-laws, list of members [and their activities, 1903-04, together with references to published accounts of ascents, explorations, etc.]. 1905.

Object.—Scientific exploration and study of the higher mountain elevations and of the regions lying within or about the Arctic and Antarctic circles; cultivation of mountain craft; promotion and dissemination of knowledge regarding the regions above indicated.

Meetings.—At least one stated meeting annually, to be held in December in Boston, New York, Philadelphia, or Washington, or at such place as may be designated for that year's meeting of the A. A. A. S. The constitution provides for a Pacific section for the purpose of holding meetings for members west of the Rocky Mountains.

Membership.—50 active (annual dues, $5; life composition, $50); 7 honorary. Limited to persons who have made ascents of one or more mountain elevations considered acceptable to the board of directors, those who have conducted explorations in the Arctic and Antarctic tracts, or contributed substantially to a knowledge of the natural phenomena of the regions included in the club's field of study, and those who are engaged in a special study of recent glacial phenomena.

Publications.

The club proposes issuing a series of monographs on Typical mountains of North America. At present its organ is APPALACHIA, pub. by the Appalachian Mountain Club, Boston, Mass. (*q. v.*).

American Anthropological Association.

Address.—Secretary: George Grant MacCurdy, Yale University, New Haven, Conn. Editor: F. W. Hodge, 1333 F Street, N. W., Washington, D. C.

History.—Incorporated in the District of Columbia, Mar. 26, 1902; organized in Pittsburg, June 30, 1902.

Ref.: American Anthropologist, n. s., v. 5, 1903, p. 178-192.

Object.—To promote the science of anthropology; to stimulate the efforts of American anthropologists; to co-ordinate anthropology with other sciences; to foster local and other societies devoted to anthropology; to serve as a bond of union among American anthropologists and American anthropological organizations, present and prospective; and to publish and encourage the publication of matter pertaining to anthropology.

Meetings.—Annually in connection with the American Association for the Advancement of Science.

Membership.—269 members (annual dues, $6; reduced to $5 for members of the American Association for the Advancement of Science and the American Folk-lore Association, and $1 for members of anthropological associations receiving the American Anthropologist; life composition, $100); patrons ($1,000).

Publications.

Distribution.—Correspondence pertaining to subscriptions should be addressed American anthropologist, 41 N. Queen Street, Lancaster, Pa., or to the Treasurer, B. T. B. Hyde, American museum of natural history, New York City.

American Association for the Advancement of Science.

Address.—Permanent Secretary: L. O. Howard, Cosmos Club, Washington, D. C.

History.—First meeting in Philadelphia, Sept. 20, 1848, in pursuance of a resolution adopted at Boston in Sept. 1847, by the Association of American Geologists and Naturalists (founded 1840 as Association of American Geologists; " and naturalists " added 1843) to resolve itself into the American Association for the Advancement of Science; incorporated by act of the General Court of Massachusetts, March, 1874. Consists of the following sections: A, Mathematics and Astronomy; B, Physics; C, Chemistry;[a] D, Mechanical Science and Engineering; E, Geology and Geography; F, Zoology; G, Botany; H, Anthropology and Psychology; I, Social and Economic Science; K, Physiology and Experimental Medicine; L, Education. A botanical club and an entomological club have been organized within the association, intended to serve as a nucleus for the gathering of all persons interested in these sciences present at the meetings of the association. The library of the

association is on deposit in the library of the University of Cincinnati, Ohio.

The following societies are affiliated with the association, and usually meet in conjunction with it:

American Alpine Club, American Anthropological Association, American Chemical Society, American Fern Society, American Folk-lore Society, American Microscopical Society, American Philosophical Association, American Physical Society, American Physiological Society, American Psychological Association, American Society of Naturalists, American Society of Vertebrate Paleontologists, American Society of Zoologists, Association of American Anatomists, Association of American Geographers, Association of Economic Entomologists, Association of Plant and Animal Breeders, Astronomical and Astrophysical Society of America, Botanical Society of America, Entomological Society of America, Geological Society of America, Sigma Xi Honorary Scientific Society, Society of American Bacteriologists, Society for Horticultural Science, Society for the Promotion of Agricultural Science, Sullivant Moss Chapter, Wild Flower Preservation Society of America.

Object.—By periodical and migratory meetings, to promote intercourse between those who are cultivating science in different parts of America, to give a stronger and more general impulse and more systematic direction to scientific research, and to procure for the labors of scientific men increased facilities and a wider usefulness.

Meetings.—Annually at such time and place as may be determined by vote of the general committee. The recent practice has been to hold the meetings during the last week in December (convocation week); some of the sections meet in the summer also.

Membership.—1,351 fellows and 2,963 members (entrance fee, $5; annual dues, $3; life composition, $50); 17 incorporated scientific bodies holding membership; 2 patrons ($1,000); associates for a single meeting ($3); 3 honorary life members; 3 honorary fellows. A list of members is published in each volume of the Proceedings, giving full names and addresses.

Publications.

(*a*) The papers and proceedings of the Association of American geologists and naturalists were published in the American journal of science for the corresponding years. In addition, the following publications were issued:

Reports of the first, second, and third meetings of the Association of American geologists and naturalists, at Philadelphia in 1840 and 1841, and at Boston in 1842, embracing its proceedings and transactions. Boston, 1843. IV. 8°.

Lettered: Transactions of the American association of geologists and naturalists. 1840-1842.

Addresses by E. Hitchcock and H. D. Rogers pub. 1841, 1844 contain also Abstracts of the proceedings 1840-41 and 1844.

Abstract of proceedings at sixth annual meeting, 1845. New Haven, 1845. 8°.

Place of publication varies greatly.

List of Proceedings, with places and dates of meetings and dates of publication, on cover of v. 55.

Include reports of the Committee on indexing chemical literature which contain lists of bibliographies published during each year or in preparation. Also separate.

An edition of the Proceedings of the Cleveland meeting, 1853 (seventh meeting), printed by the local committee, was not officially adopted, and an attempt was made to suppress it. (*See* p. 281-288 of the authorized edition pub. 1856.)

Prices: $1.50 per volume for the last five years ($1 to members); earlier volumes (to members only), 50c. each. Bound in cloth, 50c. per vol. extra.

Memoirs of the American association for the advancement of science. I. Salem, Mass., 1875. 1 v. fol.

No more published. *Contents:* Fossil butterflies, by S. H. Scudder.

Since 1901 SCIENCE, published weekly by the Macmillan Co., New York, has been the official organ of the association and is sent to all members.

Distribution.—The Proceedings are exchanged. On sale by the Permanent Secretary.

Research funds.—The income from the permanent invested fund of the association (derived from life memberships, patrons' fees, and the surplus of the working fund turned over annually to the Treasurer) is used under the direction of the council in providing grants for research. Applications for such grants are made to the council and the funds are apportioned each year at the annual meeting.

Amount of fund (1903): $12,000.

American Association of Museums.

Address.—Secretary: George A. Dorsey, Field Museum of Natural History, Chicago, Ill.

History.—Organized at New York in May 1906. To include museums of North and South America.

Meetings.—Not definitely stated as yet. The 2d meeting is to be held in the spring or early summer of 1907, at Pittsburg at the call of the Council.

Membership.—Classed as active (persons actively engaged in the work of museums; annual dues, $2; life composition, $30); sustaining (museums contributing not less than $10 annually); associate; honorary (limited to 15); patrons.

Publications.

The association intends to issue a journal in the interest of museums.

American Association of Pathologists and Bacteriologists.

Address.—Secretary: Harold C. Ernst, Harvard Medical School, Boston, Mass.

History.—Founded in 1900.

Object.—Advancement of the knowledge of disease.

Meetings.—Annual meeting at such time and place as the council shall determine; other meetings as called.

Membership.—Limited to persons presenting evidences of acceptable and creditable research in pathology or bacteriology (annual dues, $10).

Publications.

Members receive the JOURNAL OF MEDICAL RESEARCH[e], Boston, Mass., edited by Harold C. Ernst and partly supported by the association.

American Bar Association.

Address.—Secretary: John Hinkley, 215 N. Charles Street, Baltimore, Md.

History.—Formed at Saratoga Springs in August, 1878.

Object.—To advance the science of jurisprudence, promote the administration of justice and uniformity of legislation throughout the Union, uphold the honor of the profession of the law, and encourage cordial intercourse among the members of the American Bar.

Meetings.—Annual meeting of 3 days, usually during the last week in August. At Saratoga Springs until 1888; since then at various cities, alternating customarily with Saratoga Springs. The following sections and auxiliary bodies meet in conjunction with the association: Section of legal education and admissions to the Bar; Section of patent, trademark, and copyright law; Association of American Law Schools; Conference of Commissioners on uniform State laws; Conference of State boards of Bar examiners.

Membership.—About 2,000 (annual dues, $5). In addition to the individual members, any State Bar Association may send 3 delegates to the meeting, and any local Bar Association in States where there is no State association may send 2

Also reprints of committee reports, proceedings of auxiliary societies, addresses, and papers.

Distribution.—Bar libraries and general libraries in which the reports will be used are furnished, when practicable, with sets of Reports without expense other than express charges.

American Ceramic Society.

Address.—Secretary: Edward Orton, Jr., Ohio State University, Columbus, Ohio.

History.—Founded 1899; incorporated in 1905.

Object.—To promote the arts and sciences connected with ceramics by means of meetings and the publication of professional literature.

Meetings.—Annual meeting, 1st Monday in Feb., at such place as the Board of trustees may decide. Other meetings as called.

Membership.—Members (40 resident and 1 foreign) must be competent to fill responsible positions in ceramics and have suitable qualifications (entrance fee, $10; annual dues, not to exceed $5). Associates (173 resident and 22 foreign) include persons interested in ceramics and the allied arts (entrance fee, $5; annual dues, not to exceed $4).

For names and addresses of secretaries of affiliated societies, *see* latest annual report in American journal of archaeology.

History.—Founded at Boston in 1879; incorporated by act of Congress, May 26, 1906. Consists of the following affiliated societies: Boston (1879), New York (1884), Baltimore (1884), Pennsylvania (1889), Chicago (1889), Detroit (1889), Wisconsin (1889), Cleveland (1895), Connecticut (1898), Washington, D. C. (1902), Iowa (1902), Pittsburgh (1903), Southwest, including Southern California, Arizona and New Mexico (1904), Colorado (1904), Cincinnati (1905), Kansas City (1906), St. Louis (1906), Rochester (1906), Utah (1906), San Francisco (1906), Northwest (1906). In 1881, the Institute founded the American School of Classical Studies at Athens (*v. infra*), and in

1895 the American School of Classical Studies at Rome (*v. infra*). It cooperated also in the establishment in 1900 of the American School for Oriental Study and Research in Palestine (*v. infra*). A Committee on American Archaeology was created in 1899 and a Committee on Art (now the Committee on Mediaeval and Renaissance Studies) in 1904. The Institute has excavated the site of ancient Assos in the Troad and made explorations in Crete, has directed the Wolfe expeditions to Babylonia and to Asia Minor, and has made special investigations in Mexico, New Mexico and among the Indians of the Southwestern United States.

Object.—To promote and direct archæological research, by aiding in the maintenance of schools for archæological study, sending out expeditions for special investigation, assisting the efforts of independent explorers, publishing the results of exploration and research, holding general meetings for the reading and discussion of papers on archæological subjects, and by disseminating exact information in regard to the progress of research by means of free public lectures under the auspices of the affiliated societies.

Meetings.—Annual meeting of the Council, 2d Saturday in May. General meeting for the reading and discussion of archæological papers, appointed ordinarily for the week which includes Jan. 1. Annual meeting of each of the affiliated societies, held in most cases during the 1st week of Nov.

Membership.—1,201 annual members (dues, $10); 164 life members ($100); 8 foreign honorary (limited to 10). All payments are made to the affiliated societies, 10% being retained by them for local uses. Any local archæological society consisting of not less than 25 members of the Institute may, by vote of the Council, be affiliated with the Institute.

Master Car Builders' Association.

Address.—Secretary: Jos. W. Taylor, 390 Old Colony Building, Chicago, Ill.

History.—Organized at Altoona, Pa., Sept. 18, 1867, as the Master Car-Builders' Association of the United States of America, several informal meetings having been held previously, the 1st at West Albany in July 1864. Name changed in June 1871 to United American Railway Master Car-Builders' Association; present name adopted in 1872.

Ref.: History and early reports . . . New York, 1885.—Report of the proceedings of the 23d annual convention . . . 1889, p. 14-17.

Object.—To advance knowledge concerning the construction, repair, and service of railroad cars by discussion in convention, investigations, and reports of the experience of its members; to provide an organization through which the members and the companies they represent may agree upon such joint action as may be required to bring about uniformity and interchangeability in the parts of railroad cars, to improve their construction, and to adjust the mutual interest growing out of their interchangeability and repair.

Meetings.—Annually in June, place and date to be determined by the Executive Committee.

Membership.—600, classed as active, representative, and life members (annual dues, as assessed, not to exceed $8; in practice the assessment has never exceeded $5). Active membership open to persons holding the position of superintendent of car department, master car builder, mechanical engineer, foreman of a railroad car shop, or similar position. Representative membership open to persons having practical knowledge of car construction and having a written appointment from the President, General Manager, or General Superintendent of any railroad company. The constitution provides also for a class of associate members, open to civil engineers or other persons having such knowledge of science or practical experience in matters pertaining to the construction of cars as would be of special value to the association or to the railroad companies.

Research funds, &c.

BACHE FUND. Founded by bequest of Alexander Bache (*d.* 1867) for the "prosecution of researches in physical and natural science, by assisting experimentalists and observers in such manner and in such sums as shall be agreed upon" by a cooperative board of 3 directors, the original members of which were selected by the testator.

Amount in Apr. 1902, $50,997.80.

WATSON FUND. Established by bequest of Professor James C. Watson (*d.* 1880) for the promotion of astronomical science. The particular objects and work to be aided by this fund are determined by a board of 3 trustees, subject to the approval of the Academy. The original board was appointed by Professor Watson, vacancies to be filled by the Academy. The income of the fund has been applied to (1) awarding from time to time a gold medal of the value of $100 accompanied by $100 in gold, to persons in any country making an astronomical discovery or producing an astronomical work worthy of special reward and contributing to the progress of astronomy; (2) setting aside annually the sum of $500, or as much thereof as may be necessary and available, for work on the smaller planets discovered by Professor Watson.

Amount in 1902, $22,000.

HENRY DRAPER FUND. Original fund $6,000 conveyed to the Academy in 1883 by Mrs. Mary A. P. Draper for the establishment of the Henry Draper medal, a gold medal of the value of $200 to be awarded every two years for the most important discovery in astronomical physics, preference to be given, in case of discoveries of equal importance, to that made by a citizen of the United States. If the medal is not awarded, the fund is to be applied to investigations in the same department of science made by a citizen or citizens of the United States. The management and control of the fund vests in the Academy, which has created a committee upon it.

Amount in Apr. 1902, $7,903.75.

SMITH FUND. A sum of $8,000 conveyed to the Academy in trust in 1884 by Mrs. Sarah J. Smith, in memory of her husband, Dr. J. Lawrence Smith, the income to be used for striking and awarding from time to time (not less than 2 years) a gold medal of the value of $200 for important original investigations of meteoric bodies, preference to be given, in case of investigations of equal importance, to one made by a citizen of the United States. Income not needed for this purpose may be used in aid of investigations of meteoric bodies, to be made by a citizen or citizens of the United States. The management of the fund vests in the Academy, which has created a permanent committee upon it.

Amount in 1902, $8,235.

JOSEPH HENRY FUND. A sum of $40,000 contributed by friends of Professor Henry in 1878 and invested for his benefit, the income to be paid to him during his natural life, and after his death to his wife and daughters. After the death of the last survivor, the fund is to

under control of a cooptative board of 3 directors, of whom two at least must be members of the Academy. Original board appointed by the trust deed.

1884. A list of works relating to Dante printed in the United States of

Harvard University.

Address.—Cambridge, Mass. President: Charles William Eliot.

History.—Founded by the General Court of Massachusetts Bay in 1636. Two years later it received a bequest from John Harvard, a non-conformist clergyman and in his honor it was named Harvard College. The title of University dates from the year 1780, when the Massachusetts Constitution of that year referred to "the University at Cambridge." The property and government of the University is vested in a co-optative board of seven persons, officially styled the President and Fellows of Harvard College (but more commonly known as The Corporation), established by the charter granted in 1650. Its acts are alterable only by the Board of Overseers. The latter body was established in 1642, but its constitution has undergone several changes. It consisted of representatives of the State and ministers of the Congregational church up to 1843 when it was freed from the control of a particular denomination; the requirement that a portion of the membership should be chosen from the clergy remained, however, until 1851. It was entirely separated from the State government in 1865 and since then its members have been elected by graduates of the university of five years' standing.

A gold medal (value, $200), established by the provisions of the will of President Barnard and endowed by him, is awarded by the Trustees of Columbia College at the close of every quinquennial period dating from July 17, 1889 to such person, if any, whether a citizen of the United States or any other country, as shall, within the five years next preceding, have made such discovery in physical science or astronomical science, or such novel application of science to purposes beneficial to the human race, as in the judgment of the National Academy of Science of the United States, shall be esteemed most worthy of such honor.

LOUBAT PRIZES. Two prizes of $1,000 and $400 respectively, endowed by Joseph F. Loubat, for the best works published in the English language upon the history, geography, archæology, ethnology, philology or numismatics of North America. The next award will be made in 1908. Competition is open, under the deed of gift, to all persons, whether connected with Columbia university or not, and whether citizens of the United States or of any other country. No treatises are eligible for the purposes of the competition except such as relate to topics involving antiquarian research, or that refer to events prior to 1776. Authors are invited to send copies of their works to the President of the university not later than Apr. 1 of the year in which the prize is to be awarded.

WISTAR INSTITUTE OF ANATOMY AND BIOLOGY.

Address.—Philadelphia, Pa. Director: Milton J. Greenman.

History.—Incorporated in 1892 by the University of Pennsylvania and General Isaac J. Wistar for the preservation and increase of the Wistar and Horner Museum (founded 1808), and for the promotion of advanced study and research in anatomy and biology. Its aim is to be national in character and to promote the widest cooperation among biological institutes. Its scientific policy is outlined by the Advisory board of anatomists, which was organized in 1905 and meets annually. The chief resources of the Institute are directed, at present, to researches in neurology, and it is the American central institute of the Central Commission for Brain Investigation, organized by the International Association of Academies.

Publications.

Bulletin. no. 1. Sept. 1905.

To be published at irregular intervals, containing information about the work of the Institute.

The publication of the JOURNAL OF MORPHOLOGY (v. I-XVII. Boston, Ginn & Co., 1887-1901. 8°) is to be resumed under the auspices of the Institute.

Research funds, etc.—The endowment provided by the late General Isaac J. Wistar yields at the present time about $40,000 annually. Any properly qualified investigator may be admitted to the research laboratories upon application to the Director, provided table space is available. The laboratories are well equipped with modern apparatus and supplied with the necessary reagents. In addition to the museum collections, effort will be made to collect such fresh materials as may be required for researches in the laboratory.

Prizes.—DONAHOE COMET MEDAL, founded in 1890 by Joseph A. Donahoe. A bronze medal awarded to the actual discoverer of any unexpected comet when the discovery is made in the course of regular astronomical occupations, and to that observer of any telescopic periodic comet, who obtains and promptly publishes the first precise determination of its position at any one of its expected returns. Besides making his discovery known in the usual way, the discoverer must also address a letter, giving his first observation, to the Director of the Lick Observatory by the first mail after the discovery. This letter must state the exact time of the discovery, the position of the comet, the direction of its motion (when this can be determined), and the physical appearance of the object. (58 awards up to end of 1906).

BRUCE MEDAL, founded in 1897, by Miss Catherine Wolfe Bruce. A gold medal awarded not oftener than once a year for distinguished services in astronomy. The medal is international in its character, and is awarded upon the nomination of the directors of the following observatories: Harvard College, Lick, Yerkes, Paris, Greenwich, Berlin. (6 awards to end of 1906).

NUTRITION LABORATORY. Investigations carried on at Wesleyan University and Yale University since 1904. Laboratory established at Boston, Mass., in 1906. Director: F. G. Benedict.

DEPARTMENT OF SOLAR PHYSICS. Solar observatory established 1905 on Mount Wilson, Cal.; workshops at Pasadena, Cal. Director: George E. Hale.

Publ.: Contributions from the Solar observatory, Mt. Wilson, Cal. no. 1-20. [1905-07.] 8°. (Reprints mainly from Astrophysical journal.)

DEPARTMENT OF TERRESTIAL MAGNETISM. Established 1903. Office for the compilation and discussion of data at The Ontario, Washington, D. C. A magnetic survey of the Pacific ocean is in progress and field work on land is being carried on in various parts of the world. Director: L. A. Bauer.

The Institution has also granted assistance in connection with the horticultural work of Luther Burbank since 1905 and has provided for the publication of the Index Medicus since 1903.

(ii) Small projects, which may be carried out by individual experts in a limited period of time. Many grants in aid of this class have been made.

(iii) Tentative investigations, carried on by young men and women who have shown unusual aptitude for research and have desired to pursue specific problems for one or two years. A limited number of persons have been aided by the Institution in this line of work in the hope that some of them might develop exceptional abilities. Applicants for positions of this kind must have attained a grade equivalent to that of the doctorate degree in order to be eligible.

ANNUAL REPORT of the Board of Regents . . . 1846-1906. Washington, 1847-1907. 8°.

---

[a]A system of international exchanges was begun by the Institution in 1850 for the free interchange of scientific publications between institutions and investigators in the United States and those in foreign lands. Since 1867 this has been the official channel for the transmission of United States documents to foreign governments in exchange for their official publications. *Ref.:* History of the Smithsonian exchanges, by G. H. Boehmer. (*In* Annual report of the Board of regents for 1881, p. 703-810.)—The international exchange system, by W. C. Winlock. (*In* The Smithsonian institution, 1846-1896. The history of its first half century. Washington, 1897. p. 397-418.)—The international exchange list of the Smithsonian institution. Washington, 1904. 8°.

Submitted annually to Congress and published also as Congressional documents. Since 1884 the report of the U. S. National museum forms a separate volume. 7 vols.

1846-53 reports only. 1854 to date, reports and a general appendix giving a record of the progress in different branches of knowledge, compiled largely from journals in foreign languages and the transactions of learned societies throughout the world (each paper being issued also as a reprint).

Include the following issued also separately in advance.

Report of the Secretary . . . 1847-1907. Washington, 1848-1907. 8°.

The first six reports are reprinted in an appendix to the 8th annual report of the *Board of regents* for 1853.

Also various special publications, some of which bear the series title "Smithsonian miscellaneous collections" or "Smithsonian contributions to knowledge," but are not included in the completed volumes of these series.

With the exception of 17 early publications (1846-53), Shea's Library of aboriginal American literature (9 vols., 1861-64) and 2 recent pamphlets, which are listed as A-Z, AA, AB, each volume, part, reprint or special publication has a serial number assigned to it. Titles are given in numerical order in List of publications . . . 1846-1903, by W. J. Rhees (1903: in Sm. misc. coll. v. 44) which contains also tables showing contents of volumes of "Contributions," "Collections" and "Reports."

Distribution.—The *volumes* of Contributions and Miscellaneous collections are distributed only to designated public libraries and to learned institutions and societies. A small edition of the separate papers in these two series is printed for sale or exchange. The Annual reports are regularly distributed by the Institution to libraries throughout the world, and only a limited number of the volumes remains to supply demands from other sources; they are also sold at cost by the Superintendent of documents, Government printing office, Washington, D. C., and each member of Congress has a certain number of copies at his disposal. The papers printed in the Annual reports are published separately for free distribution. Applicants for publications should state the ground of their requests, as the Institution is able to supply papers only as an aid to the research or study in which the applicant is especially interested. No *sets* of publications are for sale or distribution, as most of the volumes are out of print. For prices, *see* Classified list of Smithsonian publications available for distribution, Apr. 1907. Washington, 1907. 8°.

Research funds, prizes, &c.—The permanent fund of the Institution amounts to about $1,000,000, mainly deposited in the Treasury of the United States and bearing interest at 6% per annum. It is derived from the Smithson endowment, with savings and interest, and subsequent gifts and bequests, notably those of Thomas G. Hodgkins of Setauket, Long Island, N. Y., amounting to over $250,000. Grants are made by the Institution for various explorations and investigations; in particular, the income from $100,000 of the HODGKINS FUND

is used to promote the study of "the nature and properties of atmospheric air in connection with the welfare of man" by grants in aid of researches and by the award of the HODGKINS GOLD MEDAL for important contributions to knowledge in this field. Appointments are made by the Institution to a table which it supports at Naples Zoological Station.

U. S. NATIONAL MUSEUM.

Address.—Washington, D. C. Assistant Secretary of the Smithsonian Institution, in charge of Museum: Richard Rathbun.

History.—By its act of incorporation (1846) the Smithsonian Institution was made the custodian and the only lawful place of deposit, of all objects of art and of foreign and curious research and all objects of natural history, plants and geological and mineralogical specimens belonging to the United States. In 1858 the collections of the Wilkes Exploring Expedition and various government surveys were transferred from the Patent Office to the Institution and appropriation was made by Congress for their care and maintenance. The name National Museum first appears in an act of Congress in 1875, although it had then been in popular use for several years. In 1876, at the close of the Centennial Exposition at Philadelphia, large collections from the exhibits of foreign governments were secured for the museum and Congress made provision for the erection of a separate building which was opened to the public in 1881. A new building, provided for in 1903, is now in course of erection.

Also issued as Congressional documents.

Include reports of the Assistant Secretary [prior to 1886, Assistant Director] and curators; and papers, chiefly of an ethnological character, describing collections in the museum (also issued separately).

Report for the year ending June 30, 1897, in 2 vols., pt. 2 being a memorial of Dr. G. Brown Goode.

Circulars . . . no. 1-51. 1881-1901. 8°.

Intended to bring to immediate notice urgent wants of the museum or to promulgate special information with the least possible delay. no. 1-33, 37 repr. in Proc. v. 4, 6-8, 10; no. 35 in Report 1886.

For contents of the above series and further bibliographical details, *see* Bulletin no. 51 and suppl.

Distribution.—A certain number of copies of each Report is assigned to the Museum for distribution to libraries, to correspondents, and to contributors to the collections, while a considerable part of the edition is distributed by members of Congress. The special papers reprinted from these volumes are furnished free to those interested. The volumes of Proceedings are sent only to libraries, while the separate papers are furnished without charge to specialists and others engaged in scientific work. The Bulletins are intended principally for libraries, but are also given to known specialists working on the groups to which they relate. None of the above-mentioned publications are sold by the Museum; but when it cannot supply them, persons desiring to purchase are advised to write to the Superintendent of documents, Government printing office, Washington, D. C. Occasionally the Museum exchanges its publications for desirable specimens.

retirement in 1892, by Dr. Berg, formerly director of the Museo nacional de Montevideo, who undertook the reclassification of the museum on modern lines, and the installation of herpetological, ichthyological and biological collections. The present director succeeded Dr. Berg upon the death of the latter in 1902. The museum is at present divided into 5 sections: (i) Sección zoológica, (ii) Sección paleontológica, (iii) Sección etnológica, (iv) Sección botánica, (v) Sección geológico-mineralógica. It maintains two exploring parties in the field, one for zoology and botany, the other for geology, mineralogy and paleontology, by means of funds supplied by the national government. It has also a large library. The present name was assumed when, after the federalization of Buenos Aires in 1880, the museum passed from the control of the provincial government into the hands of the nation.

Museo Nacional.

Address.—Santiago de Chile. (Casilla 787.) Director: Federico Philippi.

History.—Founded in 1830 as a natural history collection under the direction of the French naturalist, Claude Gay. After the departure of Gay from Chile in 1842, the museum was closed until 1853, when Dr. R. A. Philippi was named director, continuing in this position until 1897, when the administration passed into the hands of his son, the present director. The museum is situated in the Quinta Normal, occupying part of the building erected for the International Exposition of 1875. It comprises sections of zoology, botany, entomology, mineralogy, geology and paleontology, and ethnology. It has also a library.

Universidad Mayor de San Marcos.

Address.—Lima.

History.—Founded in 1553 in pursuance of royal decree of May 12, 1551, approved and confirmed by papal bull of July 25, 1571. At first established in the Convento del Santo Domingo, it was afterwards transferred to San Marcelo, later (in 1576) to the building now occupied by the Chamber of deputies, situated in Calle de la Universidad, and lastly to the Colegio de San Carlos, where all the faculties are now located except those of theology and medicine, which are provided with separate buildings. During the early years of the republic the functions of the university were limited to conferring degrees in the juridical sciences. It was re-installed in 1861 under new statutes, revised in 1876.
